IN THE CLAIMS

Please amend claims 1, 7, 15, 20, 31, 39, 45 and 51 as indicated below.

1. (Currently Amended) A method for processing broadcasts, comprising:

receiving a broadcast of a program, the broadcast containing a plurality of

perspectives of the program, each of the perspectives providing a view of

a given scene from a different angle;

presenting a first perspective of the plurality of perspectives to a viewer, said first

perspective comprising a first perspective of a portion of the program;

storing at least one of the plurality of perspectives;

providing input from a viewer which indicates a desire to replay the portion of the

program from a second perspective of the plurality of perspectives;

identifying in the first perspective a first point in time in the program which

corresponds to the beginning of said portion, responsive to the input;

automatically determining a second point in time in the second perspective,

wherein the second point in time comprises an approximation of the first

point in time in the program; and

presenting the portion of the program from the second perspective to the viewer

beginning at the second point in time.

Please do not enter amendment 07/24/06 [initials]

2. (Original) The method as recited in claim 1, wherein presenting the first perspective
and storing are performed simultaneously.

3. (Original) The method as recited in claim 1, wherein storing the at least one of the
plurality of perspectives is performed automatically.

4. (Original) The method as recited in claim 1, wherein presenting at least one of the
plurality of perspectives includes presenting at least one of the stored perspectives.
